# UNIVERSITY BOULEVARD Corridor Plan

## Shaping a connected, community-centric future

Building on major Montgomery County initiatives—including the 2013 Countywide Transit Corridors Functional Master Plan, Thrive Montgomery 2050 and Vision Zero—Montgomery Planning is initiating the University Boulevard Corridor (UBC) Plan and beginning its public engagement.

This planning effort will be centered on a key five-mile stretch of University Boulevard (MD 193). Throughout this process, Montgomery Planning will strive to understand community needs as they pertain to traffic safety, regional connectivity, environmental sustainability, and economic development. The team will also explore potential opportunities for new infill development, bikeways, and future bus rapid transit (BRT). The team will also consider the potential to create a complete street—a boulevard with wider sidewalks, comfortable public transportation stops and safe access.

Conversations and collaborations with the community are central to the success of this process. We look forward to exploring how to create a sense of place, community, and safety for residents, students, employees, and visitors with you.

### Upcoming Meetings

**November 2**

7 p.m. at Blair High (In-Person)

**November 7**

Virtual

## University Boulevard Corridor

Corridor plans like the University Boulevard Corridor Plan will help us gradually realize the exciting vision for compact growth, supported by a world class transit system and a safe, comfortable, and appealing network for walking, biking, and rolling.

To join the conversation and learn more about events, visit [montgomeryplanning.org/ubc](https://montgomeryplanning.org/ubc).
