Lamberton Drive Interim Traffic Safety Improvement Plan.

- Transportation Committee Chair Gil Chlewicki discussed the implementation of MCDOT's interim Traffic Safety Improvement Plan along Lamberton Drive between Arcola Avenue and Lovejoy Street.
- Residents shared both positive feedback and concerns about the project. Many said the improvements have increased crosswalk use, made crossings easier, improved pedestrian visibility, and slowed vehicle speeds. However, residents also raised concerns about the bump-out at the intersection of Lamberton Drive and Monticello Avenue / South Belgrade Road, citing reduced turning space for larger vehicles and increased traffic signal delays.
- The Transportation Committee will develop a proposal for possible modifications to the interim improvements, with particular attention to the intersection of Lamberton Drive and Monticello Avenue / South Belgrade Road. The committee expects to present and vote on the proposal at the September KMCA meeting.
